

## Travel Tray

- 1) Gather materials, make any size: use low loft batting, thin....might be able to use fusible fleece, use lighter fabric for inside to see your stuff
- 2) Fabric right sides together, batting on the bottom of the stack
- 3) Sew around, leave 3-4" to turn; turn and press, tucking in opening ends; topstitch around which will close the opening
- 4) measure 1.5" in from all sides and mark with disappearing ink or like, stitch over lines
- 5) Quilt inner area, either with straight lines or random, use 2 colors of thread if needed
- 6) Velcro strips applied; put over the marked line, sew down the middle 1/2 on one side, and 1/2 on the other side  
Some models use snaps, either works...this was easier for me
